

Contents

Preface.....	xi
Prerequisites for This Course.....	xi
Avid Audio Training Paths.....	xii
Conventions and Symbols Used in this Guide.....	xiii
Cross-Platform Issues.....	xiv
About This Book.....	xv
Lesson 1. Getting Started.....	1
About This Course.....	2
Requirements for Exercises.....	2
Software and Hardware.....	2
Working with I/O Settings.....	2
Saving and Reusing I/O Settings.....	3
Viewing, Modifying, and Restoring I/O Settings.....	4
Setting the Audition Path.....	10
Setting the Default Output Bus.....	11
Configuring Pro Tools Hardware Settings.....	11
Setting the Default Sample Rate.....	11
Changing the Clock Source.....	12
Configuring the Footswitch Control.....	13
Using a Dedicated Control Panel.....	13
Optimizing Pro Tools Performance.....	14
Playback Engine.....	14
Hardware Buffer Size.....	14
Host Engine Error Suppression.....	15
Cache Size (Pro Tools HD Only).....	16
Adding Tracks to Your Session.....	16
Adding a New Track Like the Previous.....	16
Adding a New Track of a Specific Type.....	17
Edit and Mix Window Display Options.....	17
Changing the Display of the Mix and Edit Windows.....	17
I/O View.....	19
Comments View.....	20
Track List Display Options.....	20
Showing and Hiding Tracks.....	20
Using the Track List Pop-Up Menu.....	21
Sorting Tracks.....	22
Review/Discussion Questions.....	23
Exercise 1. Setting Up a Session.....	25

Lesson 2. Managing Session Data and Media Files	31
Pro Tools Software Capabilities.....	32
Basic Specifications.....	32
Plug-Ins.....	32
Pro Tools HD Software.....	32
Working with Digital Video	33
Video Editing Features of Pro Tools HD	33
Setting Up Video Tracks.....	33
Assembling Video Clips on Video Tracks.....	34
Video Playback on a Secondary Monitor	35
Workspace Browsers	36
Browser Features	36
Workspace Browser Overview	36
Workspace Browser Functionality	38
Waveform Display.....	38
Importing Files and Session Data.....	41
Considerations for Importing Files.....	41
Importing Files Using a Workspace Browser.....	42
Importing Files Using the Import Commands.....	47
Importing Session Data.....	50
Batch Importing Files	52
Clip Groups	52
Creating Clip Groups.....	53
Ungrouping Clips.....	56
Regrouping Clips.....	56
Editing Clip Groups	57
Clip Groups and Tick-Based Tracks	57
Clip Groups in the Clip List.....	58
Review/Discussion	59
Exercise 2. Working with Digital Video (Optional)	60
Lesson 3. Recording MIDI and Audio	65
Setting Up the Session	66
Displaying Conductor Rulers	66
Adding Meter and Tempo Events.....	66
Creating a Linear Tempo Change.....	69
Recording with a Click	71
Recording Selections	73
Creating a Selection	73
Using Pre- and Post-Roll	78
Loop Recording Audio and MIDI	81
Loop Recording Differences: Audio Versus MIDI	81
Capturing Loop Record Takes	81

Auditioning Loop Record Takes.....	82
Setting the Match Criteria.....	83
Selecting Alternate Takes.....	84
Recording MIDI Using Loop Playback with MIDI Merge.....	85
Review/Discussion.....	86
Exercise 3. MIDI Recording	87
Lesson 4. Working with MIDI & Virtual Instruments.....	93
Understanding Track Timebases.....	94
Sample-Based Operation Versus Tick-Based Operation	94
Track Timebases.....	95
Tick-Based Timing and Note Values	96
Virtual Instruments	97
Using Plug-In Virtual Instruments.....	97
Using Stand-Alone Virtual Instruments.....	97
MIDI-Compatible Tracks and Track Views.....	99
Viewing MIDI Data in the Edit Window	100
MIDI-Compatible Tracks in the Pro Tools Mix Window	102
Auditioning and Playing Back MIDI.....	103
MIDI Thru Versus the Default Thru Instrument.....	103
Auditioning MIDI Clips.....	104
Editing MIDI Data.....	105
Editing MIDI Clips.....	105
Editing MIDI Notes with the Pencil Tool	106
Editing Existing MIDI Notes	109
Deleting MIDI Notes	112
Review/Discussion.....	114
Exercise 4. Using Virtual Instruments	116
Lesson 5. Working with Elastic Audio.....	121
Elastic Audio Basics	122
Enabling Elastic Audio on a Track.....	122
Auto-Enabling Elastic Audio for New Tracks.....	124
Understanding Elastic Audio Analysis.....	125
Conforming Clips to the Session Tempo Map	125
Warp Indicators	126
Removing Clip Warping	127
Elastic Audio Track Views.....	127
Elastic Audio Markers.....	128
Warping Sound with Elastic Audio	129
Using Warp View.....	129
Types of Manual Warping.....	131
Using Elastic Audio to Tighten a Rhythmic Performance	134
How Quantizing Affects Elastic Audio Events	134
Improving the Quantization Results	134

Using Elastic Audio to Experiment with Tempo	134
Applying Tick-Based Timing to Elastic Audio-Enabled Tracks.....	135
Applying Tempo Changes	135
Improving the Quality of Warped Audio.....	136
Editing Event Markers in Analysis View	136
Adjusting Event Sensitivity	138
Using X-Form.....	139
Using Elastic Audio for Pitch Changes.....	140
Pitch Shifting with the Elastic Properties Window	140
Pitch Shifting with the Transpose Window.....	141
Changing and Undoing Pitch Transposition.....	142
Review/Discussion	143
Exercise 5. Working with Elastic Audio.....	145
Lesson 6. Editing and Fine-Tuning a Performance	151
Smart Tool.....	152
Activating the Primary Smart Tool Functions	152
Creating Fades Using the Smart Tool.....	153
Smart Tool Fade Rules.....	153
Creating Rhythmic Changes for Audio and MIDI Data	154
Using Grid Quantize Versus Groove Quantize.....	154
Using Input Quantize	156
Quantizing After Recording.....	157
Setting the Options for Groove and Feel	160
MIDI Real-Time Properties	162
Using the Real-Time Properties View.....	162
Using the Real-Time Properties Floating Window.....	163
Enabling Real-Time Properties	164
Quantizing with Real-Time Properties	164
Working with Fades	166
Using the Fades Dialog Box.....	166
Applying Fades	170
Editing Fades.....	170
Fades and Elastic Audio Processing.....	172
Review/Discussion	173
Exercise 6. MIDI Real-Time Properties	174
Lesson 7. Additional Editing and Media Management	179
Track Color-Coding	180
Clip Looping	181
Working with Clip Loops.....	182
Creating Looped Clips.....	182
Modifying Clip Loop Settings	184
Editing Looped Clips.....	184
Considerations for Working with Clip Loops	186
Unlooping Clips.....	186

Editing on the Grid.....	187
Using Grid Mode.....	187
Separating Clips on the Grid.....	188
AudioSuite Overview.....	189
AudioSuite versus Insert Processing.....	189
AudioSuite Features.....	189
Using AudioSuite Plug-Ins.....	190
Working with the Clip List.....	197
Finding a Clip in the Clip List.....	198
Cleaning Up the Clip List.....	201
Exporting Clips and Clip Definitions.....	205
Review/Discussion.....	208
Exercise 7. Working with Clip Loops and Editing on the Grid.....	210
Lesson 8. Basic Mixing and Signal Flow.....	217
Track Type Icons.....	218
Solo and Mute Status Indicators.....	218
Using Inserts for Effects Processing.....	219
Inserts on Audio Tracks and Aux Inputs.....	219
Inserts on Master Faders.....	219
Plug-In Inserts.....	219
Hardware Inserts.....	220
Using Sends and Returns for Effects Processing.....	221
Creating a Send.....	221
Setting the Send Level.....	223
Changing the Default Send Level Preference.....	223
Send Display Options.....	224
Creating a Return.....	225
Working with Sends.....	228
Using the Send Window.....	228
Moving and Copying Sends.....	231
Changing and Removing Sends.....	232
Using Native Plug-Ins.....	232
Using Gain-Based Processors.....	232
Using Time-Based Processors.....	232
Using the Plug-In Window.....	233
Master Fader Tracks.....	234
Uses of Master Faders.....	235
Creating Master Faders.....	235
Review/Discussion.....	236
Exercise 8. Adding Music and Effects Processing.....	238
Lesson 9. Writing and Editing Automation.....	245
Understanding Automation.....	246
Groups and Automation.....	246
Automation Playlists.....	246

Automation Modes.....	247
Working with Automation.....	248
Enabling and Suspending Automation.....	248
Writing Automation Selectively.....	249
Playing Automation.....	250
Viewing Automation.....	250
Graphical Editing of Automation Data.....	251
Automation Displays.....	252
Creating and Adjusting Breakpoint Automation Data.....	252
Drawing Automation.....	253
Cutting, Copying, and Pasting Automation Data.....	255
Cutting Automation Versus Deleting Automation.....	255
Using Cut, Copy, and Paste Commands.....	256
Using Paste Special Mode.....	257
Removing Automation from a Track.....	258
Deleting Breakpoints on the Displayed Automation Graph (Recap).....	258
Clearing Automation for the Displayed Automation Graph.....	258
Clearing Automation for All Automation Graphs.....	258
Review/Discussion.....	259
Exercise 9. Using Automation.....	261
Lesson 10. Using Advanced Mixing Techniques and Creating Final Media.....	267
Working with Track Subsets.....	268
Using the Do-To-Selected Function.....	268
Using Submaster Tracks.....	269
Routing Signals Using Paths and Selectors.....	270
Grouping Tracks.....	273
Understanding Mix and Edit Groups.....	273
Creating a Group.....	275
Activating and Deactivating Groups.....	276
Working with Groups.....	278
Identifying Group Membership.....	278
Selecting Members of a Group.....	279
Modifying a Group.....	280
Deleting a Group.....	281
Using the All Group.....	282
Groups and Automation.....	282
Groups and Elastic Audio.....	282
Creating Final Media.....	283
Creating a CD-Compatible Bounce.....	283
Creating an Archive.....	284
Review/Discussion.....	287
Exercise 10. Mixing Techniques.....	289
Index.....	296
